BILL NO.	PRIME SPONSORS	SUMMARY	STATUS
E2SSB 5329	Litzow, Hobbs, Fain	<p><b>Transforming Persistently Failing Schools</b> - Updates the criteria used by the Superintendent of Public Instruction (SPI) to identify persistently lowest-achieving schools to conform to revised federal rules and guidance, to be applied equally to both Title I and non-Title I schools. Permits state as well as federal funds to be used for school improvement in a Required Action District (RAD). Replaces a requirement that a RAD use one of four federal intervention models with a requirement for use of a school improvement model approved by the SPI. Authorizes the State Board of Education (SBE) to designate a RAD that has implemented a required action plan for at least three years and has not made adequate progress to a new Level II RAD process. Authorizes such a designation after one year of required action for districts that received federal school improvement grants in 2010 or 2011. Directs that the SPI work with the school board to develop a Level II Plan that includes specified interventions and conditions binding on the district. Provides a process and authority for the SPI to submit a Level II Plan directly to the SBE and to direct actions that must be taken by school district personnel if the school board does not agree to a Level II Plan, or if the Level II Plan is not implemented as specified. Allows a school board to request a review by a Required Action Plan Review Panel if the SPI submits a Level II Plan directly. Directs the SPI to design a system of support, assistance, and intervention that applies equally to Title I and non-Title I schools if funds are available, and is implemented in the 2014-15 school year. Establishes a legislative task force to oversee implementation and monitor outcomes from the educational accountability system, including the designation of districts to the Level II RAD process.</p>	C 159 L 13
ESSB 5491	McAuliffe, Litzow, Kohl-Welles	<p><b>Establishing Statewide Indicators of Educational Health</b> - Establishes six statewide indicators of educational system health, including student achievement on state assessments, graduation rates, and post-graduation education and employment. Directs the State Board of Education and other education agencies to identify performance goals and measurements associated with the indicators and submit a status report each biennium. Provides that if the educational system is not on target to meet the goals, recommendations must be made for evidence-based reforms intended to improve student achievement.</p>	C 282 L 13

BILL NO.	PRIME SPONSORS	SUMMARY	STATUS
SB 5496	Braun, Fain, Hatfield	<p><b>Authorizing Approval of Online School Programs in Private Schools</b> - Provides that if an approved private school applies also to offer an online school program, the statutory requirement for private schools to offer a specified number of instructional hours is deemed met. Authorizes the State Board of Education to approve such an online school program if other statutory requirements for private schools are met. Directs the Private Education Advisory Committee of the Office of the Superintendent of Public Instruction to examine issues associated with state approval of private online school programs and submit a report to the Legislature by January 10, 2014.</p>	C 161 L 13
ESSB 5563	Kohl-Welles, Litzow, Rolfes	<p><b>Regarding Training for School Employees in the Prevention of Sexual Abuse</b> - Adds the identification of commercial sexual abuse of a minor and sexual exploitation of a minor to the course on Issues of Abuse that is required to receive initial certification as a teacher. Expands the educational materials developed by the Washington Coalition of Sexual Assault Programs to include materials related to the prevention of child sex trafficking.</p>	C 10 L 13
ESB 5620	King, McAuliffe	<p><b>Changing School Safety-Related Drills</b> - Increases the number of school lockdown drills from one to three, and requires one other safety-related drill determined by the school. Decreases the number of fire evacuation drills from six to three.</p>	C 14 L 13

Permits the OSPI to issue a reprimand as an alternative to suspension or revocation of a school employee's certificate. Allows a certificated school employee's certificate to be suspended or revoked based on a complaint from the PESB alleging fraudulent submission of a test for educators.</p>	C 163 L 13

BILL NO.	PRIME SPONSORS	SUMMARY	STATUS
ESSB 5946	Dammeier, Frockt	<p><b>Strengthening student educational outcomes</b> - Directs school districts to discuss appropriate grade placement with parents and provide intensive reading improvement strategies based on student performance on the third grade English Language Arts (ELA) assessment. Requires report cards for kindergarten through fourth grade (K-4) students to include whether the student is reading at grade level. Expands the Learning Assistance Program (LAP) to include strategies to reduce disruptive behavior in the classroom and requires school districts to focus LAP funds first on reading improvement for K-4 students. Allows districts to use 5 percent of LAP funds to develop partnerships with community organizations and local agencies to deliver academic and nonacademic supports to improve readiness to learn. Directs the Office of the Superintendent of Public Instruction (OSPI) to develop state menus of best practices for K-4 reading improvement and other uses of LAP funds and requires school districts to use practices from the menus beginning in 2016-17 under certain circumstances. Replaces state-approved LAP plans with annual reports on student academic growth and progress. Directs the OSPI to convene a discipline task force to develop definitions and data collection standards and specifies revised data collection on student discipline. Prohibits student suspensions or expulsions of indefinite length. Requires that student suspensions or expulsions not exceed one year unless authorized by the district superintendent based on rules adopted by the OSPI that outline limited circumstances for extensions. Requires school districts to create an individually tailored reentry and reengagement plan for long-term suspended or expelled students. Establishes an Educator Support Program for beginning and probationary teachers, if funds are appropriated. Defines Alternative Learning Experiences (ALE) by type of course rather than by type of program, including definitions based on the amount of weekly in-person instructional contact. Allocates funding for ALE courses using the statewide average Basic Education rate for high school students. **Summary of the  
2013-15  
& 2013 Supplemental  
Operating Budget  
(3ESSB 5034)**

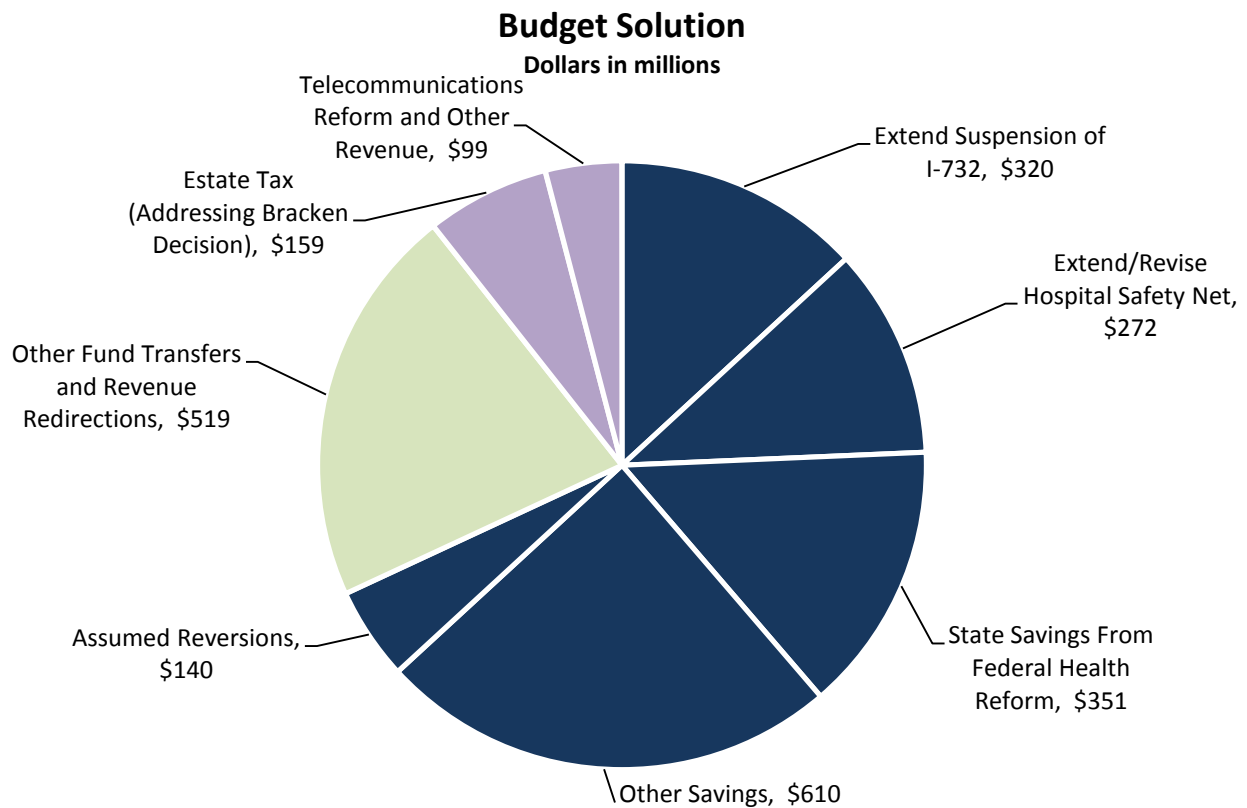

## Summary of 3ESSB 5034

The Legislature entered the 2013 session with a slowly improving economy, rising caseload and per capita costs, as well as other fiscal issues to consider including how to address the state Supreme Court's McCleary decision (K-12 funding). In the 2013-15 Biennium, the cost of continuing current programs and complying with current laws exceeds forecasted revenue by approximately \$800 million. This is sometimes referred to as the maintenance level shortfall.

The operating budget for 2013-15 includes \$1.7 billion in additional policy enhancements (\$1.03 billion of that in K-12 education). Taken together with leaving an ending fund balance and the maintenance level shortfall, the combined budget problem statement is approximately \$2.47 billion.

The budget addresses this budget problem statement through:

- Fund transfers and revenue redirections of \$519 million;
- Reduced spending of about \$1.55 billion;
- Assumed reversion of \$140 million; and
- Increased revenue of \$259 million (primarily Bracken and telecommunications).

The budget, after partial vetoes and including appropriations made in other legislation, leaves \$625 million in projected total reserves (\$48 million in NGF-S ending fund balances and the remainder in the Budget Stabilization Account).

The budget, under the provisions of the statutory four-year outlook (Chapter 8, Laws of 2012), is projected to end the 2015-17 biennium with \$1.3 billion in total reserves (\$375 million in NGF-S and the remainder in the Budget Stabilization Account).

## **Education**

### **K-12:**

The budget makes \$1.03 billion in policy enhancements. The larger ones include:

- \$374 million for increased materials, supplies, and operating costs (MSOC);
- \$143 million for Learning Assistance Program (LAP) expansion;
- \$132 million for pupil transportation;
- \$104 million to reduce early elementary class size;
- \$97 million in additional instructional hours;
- \$90 million to expand all-day kindergarten;
- \$24 million for guidance counseling and parent coordinators;
- \$19 million for bilingual education;
- \$15 million for teacher and principal evaluations and training; and
- \$10 million for struggling schools.

The larger K-12 policy savings include (see compensation for I-732):

- \$25 million in savings from assessment changes;
- \$24 million in savings from eliminating the SHB 2776 hold harmless; and
- \$11 million in savings from Alternative Learning Experience (ALE) program audit recoveries.

### **Higher education:**

The larger policy enhancements include:

- \$119 million in additional funding for the four-year institutions and community and technical colleges;
- \$17 million net for financial aid;
- \$17 million for targeted state support; and
- \$11 million for the Student Achievement Initiative.

The net financial aid amount is a \$36 million increase for College Bound Scholarships and reductions of \$19 million from re-suspension of smaller scholarship programs (WA Scholars, WAVE, Health Professions Scholarship, and Future Teaches Scholarships). Current recipients are not impacted.

The budget assumes no tuition increases for the 2013-15 biennium. Four year institutions and the community and technical colleges are authorized to exercise tuition setting authority beginning in the second year of the biennium. Institutions that chose to increase tuition are required to provide additional funding for student financial aid and cover any impact to the State Need Grant.

**Early Learning and Child Care:**

The larger policy enhancements include:

- \$25 million for Early Childhood Education Assistance Program (ECEAP) enhancements; and
- \$16 million for child care vendor rate increases.

## **Health and Human Services**

**Medicaid expansion under the Affordable Care Act:**

The budget assumes NGF-S policy savings of approximately \$351 million from opting into the Medicaid expansion. It is estimated that the state will receive additional federal funding of \$1.3 billion and cover an additional 250,000 clients.

**Health Care and Human Services:**

The larger policy enhancements include:

- \$146 million for home care worker compensation (Individual Provider and Agency Provider) related to the arbitration award;
- \$25 million for telecommunications programs that replaces funding previously provided from dedicated sources (Washington Telephone Assistance Program, and Telecommunications Relay Service);
- \$23 million for adult dental services;
- \$18 million for involuntary treatment in mental health; and
- \$11 million for placements for clients with developmental disabilities.

The larger policy savings, in addition to Medicaid expansion discussed above, include:

- \$272 million in savings from reauthorizing the Hospital Safety Net Assessments;
- \$156 million in TANF/Working Connections Child Care forecasted caseload savings;
- \$31 million in savings from delaying the nursing home rate rebase;
- \$20 million in savings from ABD/HEN/housing changes; and
- \$14 million in savings from suspending the Paid Family Leave Program.

## **General Government, Natural Resources, and Other Items**

The larger policy enhancements include:

- \$36 million for debt service on anticipated new capital projects.

The larger policy savings include:

- \$39 million in savings from shifting program funding to State/Local Toxics accounts (from NGFS);
- \$30 million in savings from Lean management;
- \$12 million in savings from shifting program funding to the Judicial Stabilization Account;
- \$11 million in savings from shifting selected public safety program funding to the E911 account;
- \$10 million in savings from shifting selected audit activities funding to the Performance Audit Account; and
- \$10 million in savings from suspending the transfer to the Local Public Safety Account.

## **Compensation Items**

Collective bargaining agreements negotiated with former Governor Gregoire are approved, includes funding of \$39 million for step M.

I-732 (Cost Of Living Adjustments) is suspended during the 2013-15 biennium for a savings of \$320 million (impacts K-12 and community and technical colleges).

State employee health benefit funding is reduced based on lower utilization and other lower than anticipated costs, saving about \$17 million.

A PEBB coverage waiver surcharge is added saving about \$15 million.

Implementation of the Affordable Care Act and efficiencies are expected to save an additional \$10 million in publicly funded health care benefits.

Temporary salary/compensation reductions are restored at maintenance level for state employees and K-12 state-funded employees.

## **Revenue**

Assumed tax legislation includes:

- The Bracken court decision, which reduced forecasted estate tax revenue to the Education Legacy Trust Account by \$163 million. Engrossed House Bill 2075 (estate taxes) was enacted into law and is estimated to restore \$159 million of that amount.
- Second Engrossed Second Substitute House Bill 1971 (communications services) is estimated to increase GF-S revenue by \$110 million in 2013-15. (The net impact is less as there is \$25 million in spending to support programs previously funded by dedicated taxes.)
- Engrossed Substitute Senate Bill 5882 (tax preferences) provides additional tax exemptions that will reduce revenues by an estimated \$12 million in the 2013-15 biennium.

Budget-driven revenue, fund transfers, and other items make up other resource changes assumed in the budget.

## **Additional Information**

### **Appropriations in other Legislation:**

In addition to the budget bill (3ESSB 5034), appropriations were made in E2SSB 5912 (Impaired Driving). These amounts are included in the balance sheet.

### **Veto Actions & Lapses:**

The Governor vetoed several provisions contained in 3ESSB 5034 (veto message attached). Several appropriations in 3ESSB 5034 were contingent on passage of separate legislation and funding lapses if that legislation was not enacted by June 30, 2013. The combined fiscal impact of lapses and vetoes is to reduce general fund appropriations by \$10.6 million.

### **Additional Information about This Budget:**

This information is provided in explanation of the operating budget. This legislation covers both the 2013 Supplemental (amending the existing budget for the 2011-13 Biennium) and the budget for the upcoming 2013-15 Biennium.

A complete set of materials produced by the House Office of Program Research (OPR) is available at <http://leap.leg.wa.gov/leap/budget/detail/2013/ho1315p.asp> . Additional materials include:

- Agency detail showing line item changes by agency (program level in selected areas such the Department of Social and Health Services and Public Schools); and
- Any supporting schedules referenced in the budget.

A more detailed document (Legislative Budget Notes) will be published in September.

Note: It is possible for similar items to be summarized in slightly different ways. For example, the agency detail document lists items on an agency by agency basis. This summary may total the same item from multiple agencies into a single description. It also may summarize multiple similar items into a single description. For that reason, it is possible that budget items might be grouped differently, even within a single document.

June 30, 2013

To the Honorable President and Members,  
The Senate of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Sections 103(10); 103(11); 114(3); 124(2); 124(3); 124(4); 124(5); 130(5); 148(4); 150, page 37, lines 33-36 and page 38, lines 1-7; 205(1)(e); 208(7); 213(35); 213(36); 217(5); 219(25); 302(8); 307(15); 501(1)(a)(v); 610(1); 610(2); and 610(8), Third Engrossed Substitute Senate Bill 5034 entitled:

“AN ACT Relating to fiscal matters.”

**Section 103(10), page 6, Joint Legislative Audit and Review Committee, Study of State Agency Performance Indicators and Performance Measurement Process**

This proviso directs the Joint Legislative Audit and Review Committee to study the effectiveness of state agency performance indicators and performance measurement processes established in Chapter 43.88 RCW, the state Budget and Accounting Act. My administration is already conducting a thorough and rigorous review of state agency performance indicators and measurements through our Results Washington initiative. I appreciate the Legislature’s interest in performance management, but this review would be unnecessarily duplicative. For these reasons, I have vetoed Section 103(10).

**Section 103(11), page 6, Joint Legislative Audit and Review Committee, Study of Electricity Cost Impacts from Renewable Energy Standards**

This proviso directs the Joint Legislative Audit and Review Committee to assess the cost impacts of the state’s renewable electricity standards without also evaluating the economic and environmental benefits of renewable energy. The study is unnecessary, as there are cost controls built into the standards. In addition, improvements to the Energy Independence Act will also be considered through the ongoing efforts of the Climate Legislative and Executive Workgroup created in Chapter 6, Laws 2013 (E2SSB 5802). For these reasons, I have vetoed Section 103(11).

**Section 114(3), page 9, Administrator for the Courts, Office of Chief Information Officer Approval of Judicial Technology Expenditures**

This proviso requires the Administrative Office of the Courts (AOC) to work with the Office of the Chief Information Officer (OCIO) to analyze the feasibility of moving judicial branch information technology equipment into the state data center. AOC is willing to undertake this analysis, in conjunction with the OCIO, as requested. However, the proviso also prohibits AOC from expending funds appropriated for an information network hub project and computer equipment replacement unless approved by the OCIO. This limitation on AOC's appropriation authority is not necessary given AOC's commitment to work cooperatively with the OCIO. I am willing to revisit this issue, however, should the necessary analysis not proceed in a timely and efficient manner. For this reason, I have vetoed Section 114(3).

**Sections 124(2), 124(3), 124(4), 124(5), pages 16-17, State Auditor, Audit and Evaluation Requests**

The State Auditor's is requested by the Legislature to conduct various audits and evaluations on actuarial functions, managed care systems, federal compliance and fraud activity, and inmate intake and reception processes. The budget reduces the State Auditor's ability to conduct performance audits by diverting nearly \$10 million from the Performance Audits of Government Account to funds to other activities, including \$5.6 million of funding for the Joint Legislative Audit and Review Committee (JLARC). Initiative 900 created the Performance Audits of Government Account to fund comprehensive performance audits independently chosen by the State Auditor. Therefore, the State Auditor should select the audits he will perform within his limited funds. Legislatively directed audits should be performed by JLARC. For these reasons, I have vetoed Sections 124(2), 124(3), 124(4), 125(5).

**Section 130(5), page 28, Office of Financial Management, One-Stop Portal Monitoring**

This proviso requires the Office of the Chief Information Officer to submit a plan to establish performance benchmarks and measuring results of implementing a one-stop integrated system for business interactions with government. A similar reporting requirement is contained in Substitute Senate Bill 5718, which passed the Legislature, making this proviso unnecessary. For this reason, I have vetoed Section 130(5).

**Section 148(4), page 36, Department of Enterprise Services, Building Code Council Aspirational Codes**

This proviso prohibits the State Building Code Council from working on aspirational codes, which are voluntary codes that offer builders options to demonstrate new energy efficiency measures that are economically and technically feasible. Energy efficiency is the cheapest, quickest, and cleanest way to meet rising energy needs, confront climate change, and boost our economy. Therefore, I believe the Building Code Council should continue this work for the benefit of our state's taxpayers. For this reason, I have vetoed Section 148(4). Moreover, while I have not vetoed subsection (3) of this section, the proviso attempts to amend substantive law through the budget by "modifying" the Council's statutory authority and by restricting member compensation as allowed under RCW 19.27.070. Therefore, this improper proviso does not restrict the appropriation authority or activities of the Building Code Council.

**Section 150, page 37, lines 33-36 and page 38, lines 1-7, Department of Archaeology and Historic Preservation, Agency Survey and Inventory Processes**

The Department of Archaeology and Historic Preservation is directed to report to the Legislature by December 1, 2013, and a second report by December 1, 2014, regarding the agency's survey and inventory processes. No funding was provided to compile the necessary data, which is not readily available to the Department, to complete these reports. For this reason, I have vetoed Section 150, page 37, lines 33-36 and page 38, lines 1-7. However, I am directing the Department to work with interested stakeholders to provide useful and available information about the survey and inventory processes within existing resources.

**Section 205(1)(e), page 61, Department of Social and Health Services, Rate Disparity Report**

The Department of Social and Health Services is directed to report to the Legislature by December 31, 2013, with a strategy to reduce the rate disparity between urban and suburban residential service providers. No funding was provided to the Department and it does not currently collect the data necessary to complete the report. For this reason I have vetoed Section 205(1)(e).

**Section 208(7), page 73, Department of Social and Health Services, Chemical Dependency Treatment Study**

This proviso requires the Department of Social and Health Services to contract with the Washington State Institute for Public Policy (WSIPP) to study the long-term efficacy of the chemical dependency treatment program. Under Chapter 338, Laws of 2013 (2SSB 5732), WSIPP will develop an inventory of evidence-based and research-based prevention and intervention services for the Department to use in preparing a behavioral health improvement strategy. Additionally, no funding is provided to the Department to contract for this study. For these reasons, I have vetoed Section 208(7).

**Section 213(35), page 88, Health Care Authority, Rebates for Brand Name Drugs**

This proviso requires the Health Care Authority to purchase brand name drugs when it determines the cost of the brand name drug after rebate is less than the cost of generic alternatives and that the purchase of the brand rather than generic version can save at least \$250,000. The state has made a concerted effort to reduce pharmaceutical drug costs through increasing generic drug use when clinically appropriate. This requirement is administratively burdensome to implement and will likely result in increased costs rather than savings. For these reasons I have vetoed section 213(35).

**Section 213(36), page 88, Health Care Authority, Preferred Drug List Exclusions**

This proviso prohibits the Health Care Authority from including specific drugs in the Medicaid preferred drug list for the fee-for-service population. This proviso is in direct conflict with the state's goal of ensuring that our expenditures on services, devices, and medications provide the greatest health benefit for employees and clients. Excluding classes of drugs from evidence-based medicine is inconsistent with improving health care quality and reducing costs. For this reason I have vetoed Section 213(36).

**Section 217(5), page 96, Department of Labor and Industries; Section 219(25), page 105, Department of Health; Section 302(8), pages 119-120, Department of Ecology; Formal Review Process Existing Rules**

These provisos require the Departments of Labor and Industries, Health, and Ecology to establish and perform a formal review process of its existing rules within existing funds. A similar reporting requirement is included in SSB 5679, which passed the Legislature, making these provisos unnecessary. For this reason, I have vetoed Sections 217(5), 219(25), and 302(8).

**Section 307(15), pages 126-127, Department of Fish and Wildlife. Payments in Lieu of Taxes Methodology**

The Department of Fish and Wildlife is directed to develop and submit a revised payment methodology for certain counties that receive payments in lieu of taxes (PILT) for game lands managed by the Department. The revised methodology is directed to provide supplemental payments to these counties. I believe a comprehensive review of PILT for game lands should be conducted without any predetermined outcome. Therefore, I am directing the Department of Revenue to work with the Department of Fish and Wildlife and the Office of Financial Management to examine the current PILT methodologies, as well as methodologies used by other states and the federal government, to develop by December 1, 2013, options and recommendations to revise the PILT program. For this reason, I have vetoed Section 307(15).

**Section 501(1)(a)(v), page 136, Superintendent of Public Instruction**

This proviso requires the Office of the Superintendent of Public Instruction to review career and technical education and skill center formulas by October 1, 2013. The due date does not provide enough time for staff to accomplish the task. The Superintendent has expressed a commitment to completing the review by June 1, 2014. For these reasons, I have vetoed Section 501(1)(a)(v).

**Section 610(1), page 190, The Evergreen State College, Extraordinary Foster Care Cost Study**

This proviso directs the Washington State Institute for Public Policy to examine the extraordinary costs of individual foster care children to identify whether the cost of placements is consistent across similarly acute children. The Children's Administration of the Department of Social and Health Services routinely evaluates high cost placements and services but must make decisions based on the unique needs of each child. A study is not necessary at this time. For this reason, I have vetoed Section 610(1).

**Section 610(2), page 190, The Evergreen State College, Safety Assessment Tool Study**

This proviso directs the Washington State Institute for Public Policy to conduct an empirical study of the validity and reliability of the safety assessment tool used by the Children's Administration of the Department of Social and Health Services. The Department is currently evaluating the assessment tool as it implements the family assessment response system required by Chapter 259, Laws 2012 (ESSB 6555). A study at this time would be premature when the Department has not yet determined whether the assessment tool will continue to be used, modified or maintained. For this reason, I have vetoed Section 610(2).

**Section 610(8), page 191-192, The Evergreen State College, K-12 Funding Task Force**

This proviso establishes an eleven member task force on K-12 funding, to be staffed by the Washington State Institute for Public Policy. The task force is to examine and provide options on the following topics: salary allocation methodologies, career and technical education, and the appropriate use of state and local property taxes to finance public schools. Within the past three years, legislatively authorized working groups have conducted thorough reviews of compensation, career and technical education, and use of local levies. Another task force is duplicative of proposals from recent workgroups. For this reason, I have vetoed Section 610(8).

For these reasons I have vetoed Sections 103(10); 103(11); 114(3); 124(2); 124(3); 124(4); 124(5); 130(5); 148(4); 150, page 37, lines 33-36 and page 38, lines 1-7; 205(1)(e); 208(7); 213(35); 213(36); 217(5); 219(25); 302(8); 307(15); 501(1)(a)(v); 610 (1); 610 (2); and 610(8) of Third Engrossed Substitute Senate Bill 5034.

With the exception of Sections 103(10); 103(11); 114(3); 124(2); 124(3); 124(4); 124(5); 130(5); 148(4); 150, page 37, lines 33-36 and page 38, lines 1-7; 205(1)(e); 208(7); 213(35); 213(36); 217(5); 219(25); 302(8); 307(15); 501(1)(a)(v); 610 (1); 610 (2); and 610(8), Third Engrossed Substitute Senate Bill 5034 is approved.

Respectfully submitted,

Jay Inslee  
Governor

# **Summary of the 2013-15 Capital Budget (ESSB 5035)**

## Capital Budget

The 2013-15 Capital Budget was enacted as Chapter 19, Laws of 2013, 2nd sp.s, Partial Veto (ESSB 5035). Legislation authorizing the issuance of bonds to finance the bonded portion of the capital budget was enacted as Chapter 20, Laws of 2013, 2nd sp.s (ESSB 5036).

Appropriations in the capital budget totaled \$3.6 billion, including \$2.0 billion from new state general obligation bonds and \$1.6 billion from a variety of dedicated fees and taxes, federal funds, timber revenue, and the building fee portion of student tuition payments. Additionally, \$2.8 billion was reappropriated for uncompleted projects approved in prior biennia. State agencies are also authorized to enter into a variety of alternative financing contracts totaling \$147.1 million. The 2013 Supplemental Capital Budget authorized \$5.5 million in new bond appropriations.

Approximately \$374.5 million was redirected or transferred to the operating budget for the 2013-15 biennium. This includes \$354.5 million from the Public Works Assistance Account (PWAA), \$18 million from the Local Toxics Control Account, and \$2 million from the Energy Freedom Account.

For the 2013-15 biennium, all of the projected revenue from PWAA loan repayments, Real Estate Excise Tax (REET), and Public Utility Tax (PUT) are transferred in the operating budget or redirected in Chapter 9, Laws of 2013, 2nd sp.s (ESHB 2051) to the Education Legacy Trust Account (ELTA). For the 2015-17 and 2017-19 biennia, redirection of all but 2 percent of the REET and the entire PUT continues. Redirection of the Solid Waste Collection Tax from the PWAA to the state general fund and ELTA, which began in the 2011-13 biennium, also continues through 2019. Beginning with the 2019-21 biennium, revenues from all three taxes are to be deposited back into the PWAA.

STATE OF WASHINGTON  
OFFICE OF THE GOVERNOR

P.O. Box 40002 • Olympia, Washington 98504-0002 • (360) 902-4111 • [www.governor.wa.gov](http://www.governor.wa.gov)

July 1, 2013

To the Honorable President and Members,  
The Senate of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Section 5020(3), Engrossed Substitute Senate Bill 5035 entitled:

“AN ACT Relating to the capital budget.”

**Section 5020(3), pages 166-168, Superintendent of Public Instruction, 2013-15 School Construction Assistance Program – Maintenance**

This proviso directs the Superintendent of Public Instruction to create an interagency agreement with The Evergreen State College for a study by the Washington State Institute of Public Policy. The purpose of the study is to analyze the relationship between school design and student performance and to develop recommendations for the school construction assistance program. The institute is further directed to create an advisory group to assist in the development of these recommendations. I believe this study is overly broad and an unnecessary expense. The current system of evaluating school construction projects adequately addresses school capital needs. Moreover, the 2013-2015 capital budget fully funds the state’s school construction assistance program.

For this reason, I have vetoed Section 5020(3) of Engrossed Substitute Senate Bill 5035.

With the exception of Section 5020(3), Engrossed Substitute Senate Bill 5035 is approved.

Respectfully submitted,

Jay Inslee  
Governor

# **Summary of the 2013-15 Transportation Budget (ESSB 5024)**

## Summary - 2013-15 Biennial and 2013 Supplemental Transportation Budgets

Reflecting the near-completion of the Nickel and Transportation Partnership Act funding packages and the near-zero growth of the fuel tax revenue stream, the 2013-15 biennium budget and the 2013 supplemental budget include a continuation of budgetary activity but no significant new transportation projects. In addition, the budget reflects savings attributable to several budgetary efficiencies.

### 2013 Supplemental Budget Changes

Additional funds are provided in the second supplemental budget for the 2011-13 biennium for emergent reasons. Unanticipated items of note include expenditures for unanticipated snow and ice removal (\$2.2 M) and new United States Coast Guard crewing requirements for ferry boats (\$4.7 M).

The second supplemental budget also includes reductions related to unexpended appropriation authority and corrections (-\$29.8 M); slower than expected delivery in capital projects (-\$1,824.0 M); ferry fuel savings (-15.9 M); and bond market savings (-\$13.7 M).

### 2013-15 Biennial Budget: Moving Ahead with Ongoing Priorities and Meeting Backlogged Needs

The 2013-15 biennial transportation budget appropriates a total of \$8.7 billion in state, federal, and other sources of funds. Of the \$8.7 billion appropriated in 2013-15, \$5.2 billion is provided for capital projects, and \$3.5 billion is provided for operating programs.

#### *Washington State Department of Transportation (WSDOT) Highway Construction*

- No new highway construction initiatives are funded.
- For continuing priorities, funding is provided for:
  - Work on mega projects, including:
    - SR 99 tunnel;
    - SR 520 floating bridge;
    - I-5 / Tacoma high-occupancy vehicle (HOV) lanes;
    - I-405 / Kirkland vicinity widening;
    - US 395 / North Spokane Corridor;
    - I-90 / Snoqualmie Pass; and
  - The comprehensive tolling study for the I-90 corridor (\$5.2 M); and
  - Preliminary engineering and rights-of-way acquisition on several state system routes around the state, made possible by fee revenues from legislation enacted in 2012. These include the I-5 Federal Way Triangle; the SR 167 Tacoma to Puyallup new corridor; interchange justification reports for the Joint Base Lewis-McChord; the SR 520 Bellevue corridor; SR 509 Des Moines to SeaTac Freight and Congestion Relief - New Corridor; SR 9/Snohomish River Bridge Replacement; US 395 / North Spokane Corridor; and the SR 3/SR304 Bremerton Interchange Improvement.

- The governor vetoed the additional funding that was provided for further development of the I-5 Columbia River Crossing, using reallocated federal funding and Oregon funds;
- WSDOT will work with Sound Transit on implementing outside transit/HOV lanes on the outer roadways of the I-90 bridge on Lake Washington. Sound Transit is providing 100 percent of the funding for the necessary construction.
- TPA funds are provided for the construction of the new Traffic Management Center in Shoreline. The project, which improves technology and expands capacity to better address congestion issues, is \$5 million less than originally planned and accommodates tolling division staff to save \$540 thousand annually in lease costs.

#### *Washington State Ferries*

- Service on all runs is maintained at the 2011-13 levels.
- \$ 11.6 million is included for increased crewing levels mandated by the United States Coast Guard.
- \$ 143.6 million is provided for completion of two new Olympic class vessels with service set to begin in spring 2014 and winter 2015.

#### *Public Transportation and Passenger Rail Programs*

- Over \$ 319 million is provided in 2013-15 to continue higher-speed rail improvements on the Amtrak Cascades corridor. Work scheduled to begin in the next biennium includes corridor reliability upgrades, upgrading segments of track to reduce train slowdowns and mudslides, and the Tacoma-Point Defiance Bypass project.
- Funding at the same level as in 2011-13 is provided for the several public transportation grant programs, including regional mobility (\$40 million); special needs (\$25 million); rural mobility (\$17 million); vanpools (\$6 million); and the commute trip reduction program (\$6.1 million).
- \$26 million from 2012 fee increase-related revenues is provided for the purposes of public transportation grants.

#### *Other WSDOT Operations*

- Funding (\$10 M) from fees increased in 2012 is provided to help reduce the highway maintenance backlog.
- \$5.6 million is provided for further implementation of DOT's stormwater management responsibilities, including inspection and maintenance of catch-basins and use of best management practices.
- \$43.0 million in funding is provided for the continuance of the Safe Routes to School and Bicycle and Pedestrian Safety grant programs. The funds will support 58 new projects across the two programs (42 SRTS and 16 Bike/Ped) as well as complete projects from earlier biennia.
- General aviation airport grants are increased by \$1.5 million.
- Funding is provided to reduce the backlog of transportation maintenance equipment by \$6 million.

### *Washington State Patrol (WSP)*

- The mobile office platform project, in which in-vehicle computers allow troopers to easily access driver and vehicle information, is extended to WSP sergeants.
- Funding is provided to replace the damaged I-5 southbound weigh station in Everett.
- Funding is provided for roof replacements on two WSP-owned facilities in Marysville and Spokane.
- Funding is provided for upgrades to WSP weigh stations located at South Pasco, Deer Park, and Kelso.
- Funding is provided for the continuation of automated traffic safety cameras in roadway construction zones.
- Funding is provided for WSP commissioned officer pay employee benefit increases.

### *Other State Agencies*

- Funding is provided to the Transportation Commission to develop a business case for a road usage charge program and to update the Washington Transportation Plan.
- Funding is provided to the Transportation Commission to continue the Voice of Washington public survey program.
- Funding is provided to the Department of Licensing to implement several bills, including SB 5152 (Special License Plates) and SB 5182 (Vehicle Owner Information).

### *Local Governments*

- Funding from the county portion of the fuel tax is provided for the development and maintenance of a system of performance measures for counties' transportation systems.
- Funding is provided to implement web infrastructure to support and accelerate planning, permitting, and compliance at the state and local levels.

### Efficiencies and Savings

- The budget assumes a number of efficiencies in WSF management and a reduction in operating costs in the new vessels.
- WSDOT is directed to use results from an internal cost-of-service study and a state audit to reduce toll operations costs by 5 percent.
- Funding authority is reduced by \$1 million for the Department of Licensing to reflect staffing efficiencies.
- Administrative and staffing reductions of \$3.0 million are taken in various WSDOT programs.

## Studies

The budget includes the following studies:

- Joint Transportation Committee (JTC) - Evaluation of WSDOT project cost drivers and potential efficiencies.
- JTC - Identification of possible issues relating to the current requirement for a person to provide a driver's license when registering a vehicle.
- JTC - Continuation of a legislative oversight committee for the I-5 Columbia River Crossing project.
- JTC - Identification and evaluation of internal refinancing opportunities for the Tacoma Narrows bridge debt.
- JTC - Review of the use of surplus property proceeds for facility replacement projects.
- Washington State Patrol (WSP) - Review of recent studies to evaluate the potential savings and benefits of consolidating dispatch centers.
- WSDOT/Tolling Division: Integration of Good-to-Go system with State Ferries Systems;
- Joint Legislative Audit and Review Committee (JLARC) - Evaluation of WSDOT highway system preservation needs analysis.
- JLARC - Forensic audit to evaluate whether public funds allocated to the CRC were misused.
- JLARC - Study of programs that regulate gas stations and other businesses that emit gasoline vapors.

May 20, 2013

To the Honorable President and Members,  
The Senate of the State of Washington

Ladies and Gentlemen:

I am returning herewith, without my approval as to Sections 201(3); 209(10); 216(5); 218(2); 306(7); 306(22); 313(4); 313(5); 602; 903, page 139, lines 23-25; 903(1); 904, page 151, lines 7-9; 904(1); 906, page 154, lines 8-10; and 906(1), Engrossed Substitute Senate Bill 5024 entitled:

“AN ACT Relating to transportation funding and appropriations.”

**Section 201(3), page 7, Washington Traffic Safety Commission, Traffic Safety Resource Prosecutor Program**

This proviso requires the traffic safety prosecutor program to be moved from the Washington State Patrol to the Washington Association of Prosecuting Attorneys. Before making this change, a thorough analysis of the advantages and disadvantages should be done. For this reason, I have vetoed Section 201(3) and instructed the Washington Traffic Safety Commission to investigate this proposal.

**Section 209(10), page 20, Department of Transportation, Annual Independent Audits**

The Fiscal Year 2013 annual independent audit of State Route 520 is currently under way and will be completed in Fiscal Year 2014. This proviso would require the audit to be completed through an interagency agreement between the Department of Transportation and Office of Financial Management. This change would duplicate work and delay completion of the audit required in the State Route 520 master bond resolution. For these reasons, I have vetoed Section 209(10).

**Section 216(5), page 26, Department of Transportation, Guide Signs to the City of Kenmore and Other Destinations**

Traffic control signing, including guide signs to destinations, should be done in a cooperative manner between the Department of Transportation and the requestor to ensure that safety and motorist needs are met. State and federal regulations and policy are in place to guide this process. This proviso, therefore, is unnecessary. For this reason, I have vetoed Section 216(5) and directed the Department to work with the City of Kenmore to resolve their traffic control signing issues.

### **Section 218(2), page 29-30, Department of Transportation, Study on Restricting Use of Steel on Guardrail Posts**

Section 218(2) directs the Department of Transportation to contract with an independent research organization to study wood guardrails; however, no funding is provided for the study. Moreover, the Department evaluated the use of wood guardrails as recently as 2009 and is currently conducting a study concerning guardrail materials. For these reasons, I have vetoed Section 218(2).

### **Section 306(7), pages 41-42, Interstate 5/Columbia River Crossing**

Section 306(7) directs the expenditure of \$81 million, including federal funds, for the Columbia River Crossing project. I see no wisdom in expending these funds if the state of Washington does not contribute its share of funding necessary to complete the project. This section would result in the expenditure of \$81 million to no result. If there are no other funds appropriated, the bridge project cannot move forward because federal funding will disappear. In addition, this section would prohibit expenditure of federal funding that is necessary to build the bridge. If the Coast Guard permit is not issued, there is no need for the waste of \$81 million since no other option is viable.

### **Section 306(22), page 47, Department of Transportation, Report on Public or Private Entity Mitigation**

Section 306(22) requires the Department of Transportation to report to the chairs of the Senate and House transportation committees whenever it is in negotiations to provide a public or private entity mitigation for \$10 million or more. While I support the interest in transparency and accountability when negotiating public funds, non-disclosure agreements may require the Department to maintain confidentiality during certain negotiations. Therefore, I have vetoed Section 306(22) and directed the Department to develop a process to report on mitigation agreements exceeding \$10 million.

### **Section 313(4), page 57, Department of Transportation, Quarterly Reporting Requirements**

This proviso requires the Department of Transportation to report quarterly on change order details that include the name of the contractor, dollar value of the change order, and explanation of the change order. No funding was provided for either the system or human resource efforts this would require given that there is no dollar threshold for reporting change orders. For this reason, I have vetoed Section 313(4).

### **Section 313(5), page 57, Department of Transportation, Quarterly Reporting Requirements**

This proviso requires the Department of Transportation to report quarterly on all mitigation payments, including the party with whom the mitigation was negotiated, as well as the parties with whom the Department is in ongoing negotiations. No funding was provided for either the system or human resource efforts this would require given that there is no dollar threshold for reporting mitigation payments. For this reason, I have vetoed Section 313(5).

### **Section 602, page 74, Department of Transportation, Transitioning Passenger Vehicles to DES Motor Pool**

This section directs the Department of Transportation to begin transitioning its passenger vehicles to the Department of Enterprise Services motor pool and prohibits the purchase of new passenger vehicles with appropriations in this act by programs headquartered in Thurston County. However, it is not clear whether the Department of Transportation's specialty service trucks are passenger vehicles as defined in RCW 46.04.382. I believe these vehicles, such as light trucks used by maintenance workers, should remain with the Department of Transportation. For this reason, I have vetoed Section 602 and directed the Department of Transportation to work with the Department of Enterprise Services to transition its vehicles to the motor pool where practicable and where efficiencies can be created.

### **Section 903, page 139, lines 23-25, and Section 903(1), page 140, Transportation Partnership Account-State Appropriation, Improvements Program**

Due to unforeseen changes in the timing of expenditures for highway improvement projects and the lack of flexibility in the capital program budgets, this appropriation change would result in an estimated shortfall of approximately \$30 million in expenditure authority in the highway improvement program. The Department of Transportation must keep projects within the total spending plan; however, retaining the supplemental budget's original Transportation Partnership Account-State appropriation will provide flexibility in the timing of expenditures as the state transitions from one biennium to the next during the peak construction period. For these reasons, I have vetoed Section 903, page 139, lines 23-25, and Section 903(1).

### **Section 904, page 151, lines 7-9, and Section 904(1), page 151, Transportation Partnership Account-State Appropriation, Preservation Program**

Due to unforeseen changes in the timing of expenditures for highway preservation projects and the lack of flexibility in the capital program budgets, this appropriation change would result in an estimated shortfall of approximately \$23 million in expenditure authority in the highway preservation program. The Department of Transportation must keep projects within the total spending plan; however, retaining the supplemental budget's original Transportation Partnership Account-State appropriation will provide flexibility in the timing of expenditures as the state transitions from one biennium to the next during the peak construction period. For these reasons, I have vetoed Section 904, page 151, lines 7-9, and Section 904(1).

### **Section 906, page 154, lines 8-10, and Section 906(1), page 154, Transportation 2003 Account (Nickel Account)-State Appropriation, Washington State Ferries Construction Program**

## Veto Message

Due to unforeseen changes in the timing of expenditures for ferry capital construction projects and the lack of flexibility in the capital program budgets, this appropriation change would result in an estimated shortfall of approximately \$7 million in expenditure authority in the ferry capital program.

The Department of Transportation must keep projects within the total spending plan; however, retaining the supplemental budget's original Transportation 2003 Account (Nickel Account)-State appropriation will provide flexibility in the timing of expenditures as the state transitions from one biennium to the next during the peak construction period. For these reasons, I have vetoed Section 906, page 154, lines 8-10, and Section 906(1).

For these reasons I have vetoed Sections 201(3); 209(10); 216(5); 218(2); 306(7); 306(22); 313(4); 313(5); 602; 903, page 139, lines 23-25; 903(1); 904, page 151, lines 7-9; 904(1); 906, page 154, lines 8-10; and 906(1) of Engrossed Substitute Senate Bill 5024.

With the exception of Sections 201(3); 209(10); 216(5); 218(2); 306(7); 306(22); 313(4); 313(5); 602; 903, page 139, lines 23-25; 903(1); 904, page 151, lines 7-9; 904(1); 906, page 154, lines 8-10; and 906(1), Engrossed Substitute Senate Bill 5024 is approved.

Respectfully submitted,
